Alisa Biliavska

has successfully completed the online, non-credit Specialization

Certified Blockchain Security Professional (CBSP) Exam Prep

This specialization covers concepts aligned with the Certified Blockchain Security Professional (CBSP) examination and confirms your commitment to fulfilling the roles and responsibilities of blockchain security. By completing this specialization, the learner has gained proficiency in a wide variety of topics in blockchain and cryptography, blockchain security, and business implementation and security. This specialization has also helped the learner acquire the essential skills and knowledge necessary for the CBSP exam and ensure the security and integrity of blockchain systems by implementing robust security measures, conducting risk assessments, and developing secure blockchain architectures.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
